

Amber Thomas, Senior Geologist / GIS Specialist

Amber's expertise includes geotechnical research, data analysis and integration, wellsite operations (wellsite geology, technical monitoring of drilling and testing operations), planning hydraulic and chemical geothermal well stimulations, analysis of multi-disciplinary geothermal data, development of geospatial databases for cartographic presentations in ArcGIS, and development of 3D models of geoscientific data in Petrel*. Extensively trained in operational health and safety, Amber has been leading GeothermEx's HSE team since 2012. This work includes preparing emergency response plans for office and field locations, driving safety programs, and recently, significant work related to COVID 19.
