

Ann Robertson-Tait, President

Ann is a geologist who has worked in the geothermal sector continuously since 1985, after completing an MSc at the University of Auckland. She's worked on hundreds of projects in 28 countries, for a total installed capacity of 7 GW. Her geoscientific work focuses on integrated analyses of multi-disciplinary data sets to quantify resource capacity, identify drilling targets, optimize resource sustainability and longevity, and reduce project risks. Ann is a relentless promoter of geothermal energy in all its useful and environmentally friendly forms, including hybrid solutions that are accelerating the energy transformation underway today.
