

James Lovekin, Field Operations Manager

A Registered Professional Engineer in the State of California, Jim has been working in the geothermal sector since 1985. He has been responsible for planning field development and monitoring reservoir performance at numerous geothermal projects around the world. His expertise includes: planning and execution of geothermal well tests; assessment of geothermal reserves and sustainable reservoir capacity; interpretation of well logs, tracer tests, and geochemical trends; design and supervision of well workovers; prevention of scale in geothermal wells and surface facilities; selection of optimal injection strategies for geothermal fields; forecasting reservoir performance and estimating make-up drilling requirements; and budgeting and cost control for drilling and for monitoring reservoir performance.
