

Lisl Lewis, Geophysicist

Lisl has 10 years of experience in the applied geophysics domains, primarily in mining and oil/gas. Her expertise is in electromagnetic geophysics including MT, CSAMT, Marine MT and Marine CSEM, with emphases on the commercialization aspects, field programs, and operational management. She has a M.Sc. in Geophysics from San Diego State University, and a double B.Sc. in Geological Sciences and Geophysics from University of California, Santa Barbara. Prior to joining GeothermEx in March 2022, Lisl held the position of Schlumberger's Global Training Systems and Planning Manager, responsible for the alignment and continuity of Schlumberger's technical training programs across all business lines and geographies. The career hiatus in this non-technical domain broadened her perspective and further fuelled her passion to return to the applied earth sciences.
